## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

**ICPSR PROCESSING NOTES FOR #4421**  
*Census of Governments, 1992: Government Organization*

***Applicable to all datasets in this collection:***

- 1) **Documentation Discrepancies:** There are two inconsistencies between the ICPSR data collection and the Original P.I. Documentation:
- a. The Original P.I. Documentation refers to file names that do not apply to the ICPSR release of this collection. For reference, the table below lists the original file name and the ICPSR file name, without file extensions.

Original File Name	ICPSR File Name
92orgspecd	da04421-0001
92orggpg	da04421-0002
92orgschld	da04421-0003

- b. Additionally, there were SPSS setup files included in the deposit and mentioned in the Original P.I. Documentation. These are no longer relevant to the collection and have not been included in the current release.
- 2) **Undocumented Codes:** Several numeric variables throughout the data collection contain undocumented values. These values have been labeled "UNDOCUMENTED CODE."
- 3) **Additional Information:** For further information regarding the Census of Governments, 1992: Government Organization, users may refer to the [United States Census Bureau Web site](#).

***Applicable to Part 1 (General Purpose Governments) only:***

- 4) **Out-of-Range Codes:** The variable **INCYR** in Part 1 (General Purpose Governments) contains out-of-range codes, which have been labeled "OUT-OF-RANGE CODE".

**Census of Governments, 1992: Government Organization**

**Original P.I. Documentation**

## 1992 Census of Governments: Government Organization Directory Survey

Census statistics on governments are designed to account for the totality of public sector activity without omission or duplication. Governmental services in the United States are provided through a complex structure made up of numerous public bodies and agencies. In addition to the Federal Government and the 50 State governments, the Bureau of the Census recognizes five basic types of local governments. Of these five types, three are general purpose governments -- county and subcounty general purpose (municipal and township) governments -- school district governments and special district governments. The Census of Governments seeks to identify all local governments and to conduct a survey of their organization and activities. The Organization survey seeks to obtain descriptive information on the basic characteristics of governments. Most data for public schools, except data on the area served by each system, were obtained from the U.S. Department of Education, National Center for Education Statistics. Data on the area served were obtained from the Local Government Directory Survey.

The 1992 Local Government Directory Survey covered all county, municipal, town or township, school district, and special district governments that met the Census Bureau criteria for independent governments. The counts of local governments reflect those in operation on January 1, 1992. The survey was conducted by mail over a 6 month period beginning in October 1991. The final response rate was 88.2 percent.

There are 3 parts to this collection: 1) General purpose governments, 2) special district governments, and 3) school district governments (including dependent school systems but not Education Service Agencies). Depending on the type of government, the data include information on various codes used to identify the government unit, its name, population in 1990, types of public services provided, or functions of special districts, political organization of general purpose governments as well as a detail accounting of race and gender of elected and appointed officials. Special districts data provide information on area served, revenue powers, functions, and detail race and gender counts of governing body members. School data gives enrollment, number of schools, educational levels, area served and a detail accounting of race and gender of elected and appointed officials.

For each of these files SPSS Data Files were produced.

Information in the summary comes from U.S. Bureau of The Census. Census of Governments, 1992, Volume 1 No. 1 Government Organization (Introduction).

1992 CENSUS OF GOVERNMENTS  
 DIRECTORY SURVEY DATA FILE  
 (Draft Copy, July 1995)

The file is in flat ASCII text format and is divided into three sub-files. These consist of GPDATA.TXT (contains all county, municipal and township governments), SPECDATA.TXT (contains all special district governments), and SCHLDATA.TXT (contains all school district governments and dependent school systems).

EXPLANATION OF FIELDS

GOVERNMENTS ID:

The governments ID consists of four separate components, namely a state number, type code, county code and unit code.

State number: This number is assigned to the states on an alphabetical basis with Alabama represented by "01", Alaska by "02" and so forth. The District of Columbia is coded as "09" bringing the total number of codes to 51.

Type code: This number indicates the type of government or agency. The specific codes are as follows:

- 1 = County Governments
- 2 = Municipal Governments
- 3 = Township Governments

- 4 = Special District Governments
- 5 = School District Governments
- 7 = County Dependent School Systems
- 8 = Municipal Dependent School Systems
- 9 = Township Dependent School System
- 0 = State Dependent School Systems

County Codes: This is a unique three digit code assigned to each county in a particular state in roughly alphabetical order.

Unit Code: This is a unique three digit code assigned to each government of the same type within the same state and county area.

FISCAL YEAR END: The fiscal year ending date of the government in MMDD format.

RESPONSE CODE: This code indicates whether a government responded to the survey. A "1" in this field indicates that the government did respond. A "2" in this field indicates that the government did not respond. A "3" in this field for a special district government indicates that the government did not respond to the survey, but did respond to a follow-up letter asking for confirmation of the existence of the government.

POPULATION: This field contains the 1990 Decennial populations for counties, municipalities and townships.

ENROLLMENT: This field contains the 1990-1991 school year enrollment for school districts and dependent school systems. Enrollment figures were provided by the National Center for Education Statistics.

FUNCTION CODE: This is a two-digit code indicating the function(s) performed by a special district government. See the attachment for the meanings of individual codes.

HOMERULE: A code of 1 in this field indicates that the respondent government reported having a homerule charter. A "2" in this field indicates that the government reported having no homerule charter.

DATE OF HOMERULE: Governments adopting homerule charters after 1986 were asked to specify the year in which their charter was adopted.

FORM OF GOVERNMENT: Counties, municipalities and townships were asked to provide information on their form of government according to the following codes:

Counties:

- 1 = Council-Commission (elected governing body, but with no chief county executive)
- 2 = Council-Administrator (elected governing body and appointed county administrator or manager)

3 = Council-Elected Executive (elected governing body and elected chief executive)

Municipalities and Townships

4 = Mayor-Council (elected mayor and elected governing body)

5 = Council-Manager (elected governing body and appointed manager)

6 = Commission (elected board of commissioners, with each commissioner responsible for one or more departments)

7 = Selectmen or Supervisors (elected body responsible for day-to-day administration)

9 = Other

PUBLIC SERVICES: Each county, municipality and township was asked if it provided any of 17 specific public services. The governments were further

asked to indicate how each service was provided according to the following codes:

1 = The government owns and directly operates the service

2 = The government owns the facilities associated with the service, but contracts out for the actual operation

3 = The government neither owns nor operates the service, but does contract out for its provision

0 = The government does not provide the service

JOINT SERVICES: Each county, municipality and township was asked if it provided

any public services jointly with another government. A "1" indicated that

it provided joint services and a "2" indicated that it did not.

TOWNSHIP MEETING: Townships were asked if the basic policy for their government

was decided by a town meeting. A "1" indicated yes and a "2" indicated no.

TYPE OF MEETING: Townships that responded "yes" to the township meeting question

were asked what type of meeting they conducted

1 = A "direct" town meeting consisting of the voters served by the government

2 = A "representative" town meeting consisting of elected representatives of the voters served by the government.

GOVERNING BODY EMPLOYMENT STATUS: Governments were asked whether the members of their governing bodies served full (30 or more hours per week) or part time. A "1" indicates full time and a "2" indicates part time.

GOVERNING BODY TYPE OF COMPENSATION: Governments were asked what type of compensation was paid to their governing bodies.

- 1 = Salary
- 2 = Per Diem (Per day or per meeting)
- 3 = Expenses (travel, etc.)
- 4 = None

SCHOOL LEVEL CODE: This code represents the grade coverage of each individual school district or school system. This code was obtained from data provided by the National Center for Education Statistics.

- 01 = Elementary Grades Only
- 02 = Secondary Grades Only
- 03 = Elementary and Secondary Grades
- 04 = Higher Education (Postsecondary)
- 05 = Special or Vocational Education
- 06 = Non-Operating ( the system did not operate schools directly,  
but sent its students to other school systems)

AREA SERVED: School districts, school systems and special districts were asked

what specific geographic area they served according to the following scheme:

- 1 = A specific County
- 2 = A specific municipality or township
- 3 = Two or more entire counties
- 4 = Parts of two or more counties
- 5 = Wholly within a single county, but not coterminous with another governmental unit

MULTI-COUNTY CODES: School districts, school systems and special districts that indicated that they served at least part of two or more counties were asked to specify those counties. Each county served is indicated using the governments state number followed by the governments county code (the same codes used in the governments ID). Governments that indicated serving more than six counties contain a "999" in the county number of the sixth field. This field is actually a conglomeration of six separate five character fields, each containing a governments state number and county code.

BIG CITY CODE: School districts, school systems and special districts were asked if they served a city of 50,000 or more population. A "1" indicated that they did serve all or part of such a city and a "2" indicated that they did not.

ADVISORY SCHOOL COUNCILS: School districts and school systems were asked if they had advisory school councils. A "1" indicated that they did have such councils, and a "2" indicated that they did not.

TYPE OF SCHOOL COUNCILS: School districts and school systems that indicated having an advisory school council were asked what type of council they had according to the following:

- 1 = Composed entirely of elected members
- 2 = Composed entirely of appointed or ex officio members

3 = Consisting of both elected and appointed members

INCORPORATION DATE: Special districts which had incorporated after 1986 were asked for the year that they had become incorporated.

REVENUE POWERS: Special districts were asked if they possessed the following revenue powers:

Property Tax Levies  
Other Tax Levies  
Special Assessments  
Service Charges and Sales  
Grants

A number other than "0" in any of these fields indicates that the government possessed that particular revenue power.

FUNCTIONS PERFORMED: Special districts were asked to list all of the functions that they performed (up to 5) and the percentage of financial effort that they spent on each function. (See attachment for explanation of function codes)

(Function Codes from the Classification Manual are added here:

In conjunction with the regular function codes, the organization phase employs a set of function codes expressly for special district governments. These codes are limited to the organization area because, even though numerous special districts may exist for them (e.g., the 1,655 cemetery districts classified during the 1997 Census of Governments), their finances or employment are too small, they are concentrated in just a few states, or their activities are too narrow. Finance and employment data for special district organization codes are converted into the regular functions for reporting purposes, as shown by the table below.

#### Special Districts - Standard Function Code

Organization Function Code	Function Name
----------------------------	---------------

Regular Code\*

Single-Function Districts:

01	Air Transportation (Airports)	
01		
02#	Cemeteries	89
09#	Education (School Building Authorities)	
12		
24	Fire Protection	
24		
32	Health	
32		
40#	Hospitals	
36		
41#	Industrial Development	
89		

42#	Mortgage Credit	89
44	Highways (Regular or Toll)	
44		
50	Housing and Community Development	
50		
51#	Drainage	
59

94	Mass Transit System Utility	94
Multi-Function Districts:		
96#	Fire Protection and Water Supply	24/91
97#	Natural Resources and Water Supply	
59/91		
98#	Sewerage and Water Supply	80/91
99#	Other Multi-Function Districts	
Various		

\* Applies mainly to employment and expenditure data. Revenue and debt data may use different classification. Multiple-function special districts are sent questionnaires to report finance and employment data by major function.  
# Code unique to organization survey; finance and employment data subsumed into regular function code as shown in table above.  
Classification Manual - Chapter 4: Functional Classification of Government Activities  
end added code definitions from Classification Manual )

#### ELECTED OFFICIALS

Demographic data were collected for elected officials of respondent governments in the following three categories:

1. Governing Body: The principal policymaking board for a government.

2. Other Boards: Boards that perform a specialized function within a particular local government.

3. Other Elected Officials: All other officials that were directly elected by the voters.

These categories are shown in the attached record layouts. It should be noted that there is item nonresponse for the elected officials classification data. Imputation for the elected officials was made only in cases where the number of elected officials was known. There was no imputation or estimation made for racial/ethnic/gender counts where item nonresponse existed.

Demographic data was also collected for appointed governing bodies of school districts, school systems and special districts.

EX OFFICIO BOARD MEMBERS: Special districts were asked to indicate the number of governing body members which served ex officio.

#### GENERAL NOTES

The reference date of the census was January 1, 1992. Any responses of "0" in individual data items generally indicate that the question was not answered by the respondent, or that the question was not applicable.
