More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

ICPSR PROCESSING NOTES FOR #4421
Census of Governments, 1992: Government Organization

Applicable to all datasets in this collection:

1) **Documentation Discrepancies:** There are two inconsistencies between the ICPSR data collection and the Original P.I. Documentation:

   a. The Original P.I. Documentation refers to file names that do not apply to the ICPSR release of this collection. For reference, the table below lists the original file name and the ICPSR file name, without file extensions.

Original File Name	ICPSR File Name
92orgspecd	da04421-0001
92orggpg	da04421-0002
92orgschld	da04421-0003

   b. Additionally, there were SPSS setup files included in the deposit and mentioned in the Original P.I. Documentation. These are no longer relevant to the collection and have not been included in the current release.

2) **Undocumented Codes:** Several numeric variables throughout the data collection contain undocumented values. These values have been labeled "UNDOCUMENTED CODE."

3) **Additional Information:** For further information regarding the Census of Governments, 1992: Government Organization, users may refer to the United States Census Bureau Web site.

Applicable to Part 2 (Special District Governments) only:

4) **Out-of-Range Codes:** The variable **HRULYR** in Part 2 (Special District Governments) contains out-of-range codes, which have been labeled "OUT-OF-RANGE CODE".

Census of Governments, 1992: Government Organization

Original P.I. Documentation

1992 Census of Governments: Government Organization Directory Survey

Census statistics on governments are designed to account for the totality of public sector activity without omission or duplication. Governmental services in the United States are provided through a complex structure made up of numerous public bodies and agencies.   In addition to the Federal Government and the 50 State governments, the Bureau of the Census recognizes five basic types of local governments. Of these five types, three are general purpose governments -- county and subcounty general purpose (municipal and township) governments -- school district governments and special district governments. The Census of Governments seeks to identify all local governments and to conduct a survey of their organization and activities.   The Organization survey seeks to obtain descriptive information on the basic characteristics of governments. Most data for public schools, except data on the area served by each system, were obtained from the U.S. Department of Education, National Center for Education Statistics.   Data on the area served were obtained from the Local Government Directory Survey.

The 1992 Local Government Directory Survey covered all county, municipal, town or township, school district, and special district governments that met the Census Bureau criteria for independent governments.   The counts of local governments reflect those in operation on January 1, 1992. The survey was conducted by mail over a 6 month period beginning in October 1991. The final response rate was 88.2 percent.

There are 3 parts to this collection: 1) General purpose governments, 2) special district governments, and 3) school district governments (including dependent school systems but not Education Service Agencies). Depending on the type of government, the data include information on various codes used to identify the government unit, its name, population in 1990, types of public services provided, or functions of special districts, political organization of general purpose governments as well as a detail accounting of race and gender of elected and appointed officials. Special districts data provide information on area served, revenue powers, functions, and detail race and gender counts of governing body members. School data gives enrollment, number of schools, educational levels, area served and   a detail accounting of race and gender of elected and appointed officials.

For each of these files SPSS Data Files were produced.
Information in the summary comes from U.S. Bureau of The Census. Census of Governments, 1992, Volume 1 No. 1 Government Organization (Introduction).

```

The file is in flat ASCII text format and is divided into three sub-files. These consist of GPDATA.TXT (contains all county, municipal and township governments), SPECDATA.TXT (contains all special district governments), and SCHLDATA.TXT (contains all school district governments and dependent school systems).

EXPLANATION OF FIELDS

GOVERNMENTS ID:

    The governments ID consists of four separate components, namely a state number, type code, county code and unit code.

    State number: This number is assigned to the states on an alphabetical basis with Alabama represented by "01", Alaska by "02" and so forth. The District of Columbia is coded as "09" bringing the total number of codes to 51.

    Type code: This number indicates the type of government or agency. The specific codes are as follows:

                1 = County Governments
                2 = Municipal Governments
                3 = Township Governments

```
                4 = Special District Governments
                5 = School District Governments
                7 = County Dependent School Systems
                8 = Municipal Dependent School Systems
                9 = Township Dependent School System
                0 = State Dependent School Systems
```

        County Codes: This is a unique three digit code assigned to each county
                       in a particular state in roughly alphabetical order.

        Unit Code: This is a unique three digit code assigned to each government
                    of the same type within the same state and county area.

FISCAL YEAR END: The fiscal year ending date of the government in MMDD format.

RESPONSE CODE: This code indicates whether a government responded to the
     survey. A "1" in this field indicates that the government did respond.
     A "2" in this field indicates that the government did not respond. A
     "3" in this field for a special district government indicates that the
     government did not respond to the survey, but did respond to a follow-up
     letter asking for confirmation of the existence of the government.

POPULATION: This field contains the 1990 Decennial populations for counties,
     municipalities and townships.

ENROLLMENT: This field contains the 1990-1991 school year enrollment for
school
     districts and dependent school systems. Enrollment figures were
provided
     by the National Center for Education Statistics.

FUNCTION CODE: This is a two-digit code indicating the function(s) performed
     by a special district government. See the attachment for the meanings
of
     individual codes.

HOMERULE: A code of 1 in this field indicates that the respondent government
     reported having a homerule charter. A "2" in this field indicates that
     the government reported having no homerule charter.

DATE OF HOMERULE: Governments adopting homerule charters after 1986 were
asked
     to specify the year in which their charter was adopted.

FORM OF GOVERNMENT: Counties, municipalities and townships were asked to
     provide information on their form of government according to the
following
     codes:

     Counties:
          1 = Council-Commission (elected governing body, but with no chief
              county executive)
          2 = Council-Administrator (elected governing body and appointed
              county administrator or manager)

```
        3 = Council-Elected Executive (elected governing body and elected
            chief executive)

     Municipalities and Townships
        4 = Mayor-Council (elected mayor and elected governing body)
        5 = Council-Manager (elected governing body and appointed manager)
        6 = Commission (elected board of commissioners, with each
commissioner
            responsible for one or more departments)
        7 = Selectmen or Supervisors (elected body responsible for
day-to-day
            administration)
        9 = Other
```

PUBLIC SERVICES: Each county, municipality and township was asked if it
     provided any of 17 specific public services. The governments were
further
     asked to indicate how each service was provided according to the following
     codes:

     1 = The government owns and directly operates the service
     2 = The government owns the facilities associated with the service, but
         contracts out for the actual operation
     3 = The government neither owns nor operates the service, but does contract
         out for its provision
     0 = The government does not provide the service

JOINT SERVICES: Each county, municipality and township was asked if it
provided
     any public services jointly with another government. A "1" indicated
that
     it provided joint services and a "2" indicated that it did not.

TOWNSHIP MEETING: Townships were asked if the basic policy for their
government
     was decided by a town meeting. A "1" indicated yes and a "2" indicated
no.

TYPE OF MEETING: Townships that responded "yes" to the township meeting
question
     were asked what type of meeting they conducted

     1 = A "direct" town meeting consisting of the voters served by the
             government
     2 = A "representative" town meeting consisting of elected representatives
             of the voters served by the government.

GOVERNING BODY EMPLOYMENT STATUS: Governments were asked whether the
     members of their governing bodies served full (30 or more hours per week)
     or part time. A "1" indicates full time and a "2" indicates part time.

GOVERNING BODY TYPE OF COMPENSATION: Governments were asked what type of
     compensation was paid to their governing bodies.

```
1 = Salary
2 = Per Diem (Per day or per meeting)
3 = Expenses (travel, etc.)
4 = None
```

SCHOOL LEVEL CODE: This code represents the grade coverage of each individual
     school district or school system. This code was obtained from data
     provided by the National Center for Education Statistics.

```
01 = Elementary Grades Only
02 = Secondary Grades Only
03 = Elementary and Secondary Grades
04 = Higher Education (Postsecondary)
05 = Special or Vocational Education
06 = Non-Operating  ( the system did not operate schools directly,
           but sent its students to other school systems)
```

AREA SERVED: School districts, school systems and special districts were
asked
     what specific geographic area they served according to the following
     scheme:

```
1 = A specific County
2 = A specific municipality or township
3 = Two or more entire counties
4 = Parts of two or more counties
5 = Wholly within a single county, but not coterminous with another
    governmental unit
```

MULTI-COUNTY CODES: School districts, school systems and special districts
     that indicated that they served at least part of two or more counties
     were asked to specify those counties. Each county served is indicated
     using the governments state number followed by the governments county
     code (the same codes used in the governments ID). Governments that
     indicated serving more than six counties contain a "999" in the county
     number of the sixth field. This field is actually a conglomeration of
     six separate five character fields, each containing a governments
     state number and county code.

BIG CITY CODE: School districts, school systems and special districts were
     asked if they served a city of 50,000 or more population. A "1"
     indicated that they did serve all or part of such a city and a "2"
     indicated that they did not.

ADVISORY SCHOOL COUNCILS: School districts and school systems were asked if
     they had advisory school councils. A "1" indicated that they did have
     such councils, and a "2" indicated that they did not.

TYPE OF SCHOOL COUNCILS: School districts and school systems that indicated
     having an advisory school council were asked what type of council they
     had according to the following:

```
1 = Composed entirely of elected members
2 = Composed entirely of appointed or ex officio members
```

3 = Consisting of both elected and appointed members

INCORPORATION DATE: Special districts which had incorporated after 1986 were
        asked for the year that they had become incorporated.

REVENUE POWERS: Special districts were asked if they possessed the following
        revenue powers:

        Property Tax Levies
        Other Tax Levies
        Special Assessments
        Service Charges and Sales
        Grants

        A number other than "0" in any of these fields indicates that the
government
        possessed that particular revenue power.

FUNCTIONS PERFORMED: Special districts were asked to list all of the functions
        that they performed (up to 5) and the percentage of financial effort that
        they spent on each function. (See attachment for explanation of function
        codes)

(Function Codes from the Classification Manual are added here:

In conjunction with the regular function codes, the organization phase employs
a set of function codes expressly for special district governments. These codes
are limited to the organization area because, even though numerous special
districts may exist for them (e.g., the 1,655 cemetery districts classified
during the 1997 Census of Governments), their finances or employment are too
small, they are concentrated in just a few states, or their activities are too
narrow. Finance and employment data for special district organization codes
are
converted into the regular functions for reporting purposes, as shown by the
table below.

Special Districts - Standard Function Code

Organization Function Code	Function Name	Regular Code*
Single-Function Districts:		
01	Air Transportation (Airports)	01
02#	Cemeteries	89
09#	Education (School Building Authorities)	12
24	Fire Protection	24
32	Health	32
40#	Hospitals	36
41#	Industrial Development	89

42#	Mortgage Credit	89
44	Highways (Regular or Toll)	
44		
50	Housing and Community Development	
50		
51#	Drainage	
59		
52	Libraries	
52		
59	Other Natural Resources	
59		
60	Parking Facilities	60
61	Parks and Recreation	61
63#	Flood Control	59
64#	Irrigation	59
79	Public Welfare Institutions	79
80	Sewerage	80
81	Solid Waste Management	81
86#	Reclamation	59
87	Water Transport and Terminals	87
88#	Soil and Water Conservation	59
89	Other Single-Function Districts	89
91	Water Supply Utility	91
92	Electric Power Utility	92
93	Gas Supply Utility 93	
94	Mass Transit System Utility	94

Multi-Function Districts:

96#	Fire Protection and Water Supply	24/91
97#	Natural Resources and Water Supply	59/91
98#	Sewerage and Water Supply	80/91
99#	Other Multi-Function Districts	Various

* Applies mainly to employment and expenditure data. Revenue and debt data may use different classification. Multiple-function special districts are sent questionnaires to report finance and employment data by major function.
# Code unique to organization survey; finance and employment data subsumed into regular function code as shown in table above.
Classification Manual - Chapter 4: Functional Classification of Government Activities
end added code definitions from Classification Manual)

ELECTED OFFICIALS

Demographic data were collected for elected officials of respondent governments in the
following three categories:

1. Governing Body: The principal policymaking board for a government.

2. Other Boards: Boards that perform a specialized function within a particular local
government.

3. Other Elected Officials: All other officials that were directly elected by the voters.

These categories are shown in the attached record layouts. It should be noted that there is item
nonresponse for the elected officials classification data. Imputation for the elected officials was
made only in cases where the number of elected officials was known. There was no imputation
or estimation made for racial/ethnic/gender counts where item nonresponse existed.

Demographic data was also collected for appointed governing bodies of school districts, school
systems and special districts.

EX OFFICIO BOARD MEMBERS: Special districts were asked to indicate the number of
governing body members which served ex officio.

GENERAL NOTES

The reference date of the census was January 1, 1992. Any responses of "0" in individual data
items generally indicate that the question was not answered by the respondent, or that the
question was not applicable.

ICPSR 4421

Census of Governments, 1992: Government Organization

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

ICPSR has an FAQ on copyright and survey instruments.

Special District Governments

GOVCODE: Governments unit code

Based upon 38,978 valid cases out of 38,978 total cases.

Location: 1-9 (width: 9; decimal: 0)
Variable Type: character

GOVNAME: Name of Government

Based upon 38,978 valid cases out of 38,978 total cases.

Location: 10-73 (width: 64; decimal: 0)
Variable Type: character

RESCODE: Response Code

Value	Label	Unweighted Frequency	%
1	Government did respond to survey	34132	87.6 %
2	Government did not respond to survey	4846	12.4 %
